YOUR STYLE

For the contemporary bride and groom who have a personal perception of their wedding day Style matters. You will have a wide range of fine vendors and bright ideas that will make your day beautiful. You have gone through dozens of web sites to find the one studio whose photographic style matches your vision.

WHO WE ARE

We are a talented multicultural team with both professional artistic and photographic educations. We also have a wide range of creative approaches, years of experience, and are enthusiastic about our approach to make your wedding memories unforgettable.

J. Matthews Parker MFA, our lead photographer, who has over 15 years of experience in wedding and editorial industry, prefers to compare good photography with a good cuisine: it is delicious and keeps a pleasant aftertaste even after the meal.

OUR STYLE

At High Photo Arts we capture moments that tell a story, a story of your wedding day that is highlighted with your smiles, spontaneous emotions and warmth given by your families, and friends. A story that lasts...

When it comes to photography we prefer to see ourselves as a high-end designer team that customizes our photography to your personal visual style. Please, take one more look at our web site; note the variety of aesthetic approaches toward the different couples, which are united by the high and consistent quality of our photography.

Our photography is tailored to you and tells the story of your special day. It is common today to refer to photojournalism as a "must have" style for each couple. This style documents your wedding day and gives spontaneous and professionally created shots. And yes, we can also provide your family and relatives with a number of artistic portraits or traditional photographs.

Take a moment to imagine yourself at your wedding day. Do you see yourself in warm ambient light of a jazz club, the blue glow of twilight or under the cool sparks of fireworks? Are you into jazz, rock or ballroom dancing? Are romantic kisses in moonlight more to your liking? Tell us.

You have found us, now call or email us and we will be glad to tell you more about our photography, methods of work and our other products.
